

Natura B-Mix

CONSORTIUM OF BENEFICIAL MICRO-ORGANISMS

0.2KG

0.5KG

Stimulation of plants' natural defences and healing action on plant tissues

Increased flowering and fruit set, stimulation of cell division in fruit

Rapid colonisation of the rhizosphere

NUTRITIONAL COMPOSITION	%
Bacillus spp. - seven species	10 ⁹ CFU/g
Mycorrhiza of the genus Glomus SPP.	

DOSAGE AND METHOD OF USE		Applications to the plant
CROPS	PHENOLOGICAL STAGE	DOSE g/ha
Stone and pome fruits	From pre-flowering to fruit growth	250-500
Actinidia	From pre-flowering to fruit growth	250-500
Wine and table grapevines	From pre-flowering to grape berry growth	250-500
Fruiting vegetables	From pre-flowering to fruit growth	250-500
Leafy vegetables	Vegetative growth	250-500
Root, bulb, or tuber vegetables	From pre-flowering to root, bulb, or tuber growth	250-500
Strawberries and small fruits	Vegetative growth	250-500
Tomatoes for industry	From pre-flowering to fruit growth	250-500

- NOTES:**
- Do not mix with fungicides or products containing copper, sulphur, or mineral oils or other alkaline-reacting products
 - Use in combination with Organ Star to increase the effectiveness of the application
