

Natura B-Veria

REDUCTION OF STRESS CAUSED BY INSECTS TO PLANTS

0,2KG

Stimulates and increases the plants' natural defences

Good adhesive action on plant surfaces

NUTRITIONAL COMPOSITION		%
Rhizosphere bacteria content		10 ³ CFU/g
Beauveria SPP.		10 ³ CFU/g
Mycorrhiza of the genus Glomus SPP.		

TECHNICAL SPECIFICATIONS	
S.W.	0.9
pH:	5.2

DOSAGE AND METHOD OF USE		Applications to the plant	
CROPS	PHENOLOGICAL STAGE	DOSE g/ha	NOTES
Stone and pome fruits	During the entire growing cycle	200-500	Pre-transplant root bath - & Peat bath - 50-70 g/100L
Citrus trees	During the entire growing cycle	200-500	
Actinidia	During the entire growing cycle	200-500	
Wine and table grapevines	During the entire growing cycle	200-500	
Olive and hazel trees	During the entire growing cycle	200-500	
Fruiting vegetables	During the entire growing cycle	200-500	
Leafy vegetables	During the entire growing cycle	200-500	
Root, bulb, or tuber vegetables	During the entire growing cycle	200-500	
Strawberries and small fruits	During the entire growing cycle	200-500	

- NOTES:**
- Use in combination with Organ Star to increase the effectiveness of the application
 - Do not mix with fungicides or products containing copper, sulphur, or mineral oils or other alkaline-reacting products
