

Natura Nema

PROTECTS THE RHIZOSPHERE AND STIMULATES ROOT ACTIVITY

5KG

20KG

Increase in and nourishment of beneficial microbial flora

Stimulates and increases the plants' natural defences

Significant expansion of the root system and greater nutritional efficiency

NUTRITIONAL COMPOSITION	%
Total organic nitrogen (N)	1
Organic carbon (C) of biological origin	10
Plant-based organic matter	30
Polysaccharides	12
Plant extracts	8

TECHNICAL SPECIFICATIONS	
S.W.	1.25
pH:	6.5

DOSAGE AND METHOD OF USE		Fertigation
CROPS	PHENOLOGICAL STAGE	DOSE kg/ha
Fruiting vegetables	Post-transplanting	10-15
Leafy vegetables	Post-transplanting	10-15
Root, bulb, or tuber vegetables	Post-transplanting	8-10
Strawberries and small fruits	Post-transplanting	8-10
