

# Power Mix

THE RIGHT "RELATIONSHIP" WITH MICRO-DEFICIENCIES

Balanced supply of all microelements

Rapid lush plant growth and greening of tissues

Increased photosynthetic activity and cellular respiration

Increased nutrient efficiency: conveyance, modulated absorption and transport

NUTRITIONAL COMPOSITION	%
Chelated copper (Cu)	0,3
Chelated iron (Fe)	2,2
Chelated manganese (Mn)	1,6
Molybdenum (Mo)	0,1
Chelated zinc (Zn)	0,9
Complexing agent	EDTA, DTPA

TECHNICAL SPECIFICATIONS	
S.W.	1,23
pH:	7

DOSAGE AND METHOD OF USE		Foliar application
CROPS	PHENOLOGICAL STAGE	DOSE g/ha
ALL CROPS	During the entire growing cycle or when the first symptoms of micro-deficiencies appear	100-250

NOTES: ● The dose is calculated based on a volume of spraying water of 8-10 hl/ha

ORGANIC FARMING
